The Dax recovered part of Tuesday's sell-off yesterday. Predominantly sideways trade in the morning, eventually saw a test down to the **5942.0** level after the US equity open. Thereafter the market rallied for the rest of the afternoon/evening session to take back the **5966.0-75.0** area to eventually settle back around the **6000.0** handle. This partly eases the immediate bearish pressure on the market and is again evenly poised in the immediate term going into today. The highlight of the day will almost certainly be on Intel earnings after market (barring any surprises by the ECB policy announcement). Trade during the afternoon may reflect positioning going into the earnings.
